The VM-BASE project is funded with support from the European Commission under the SOCRATES Programme, MINERVA Action.

Education and Culture

Socrates
Minerva

**Virtual Mobility
Before and After Student Exchanges**

Aims

VM-Base wants to raise the quality of student exchanges by offering virtual support, both before and after the physical mobility!

The virtual support will be used to prepare and follow-up the mobile student, as a complement to the existing exchange programmes. Tips and tricks on how to coach exchange students at a distance – e-coaching – will be revealed and promoted.

All VM-Base 'blended mobility' actions highlight the European experience while taking into account the local, regional and national differences.

Outputs

- Manuals on :
 - Good practices in e-coaching
 - Validated procedures and recommendations for blended mobility activities
- Two Workshops on e-coaching

More information can be found at the project website
